

CHEFREL BARACOL

Business Process Automation Specialist | Odoo Developer | Web Developer

Dinas, Zamboanga del Sur, Philippines | +63 997-810-2140 | chefrel.baracol@gmail.com | chefbarac.github.io/portfolio

PROFESSIONAL SUMMARY

Business Process Automation Specialist and Odoo Developer with 7+ years of experience designing ERP modules, browser automation, and internal tools that convert multi-hour manual workflows into one-click processes. Driven by a low tolerance for repetitive, low-value work — if a task can be automated, I build the system instead of repeating the task. Proven record of reducing production time and error rates through custom software built in Python, JavaScript, and Odoo. Based in the Philippines, available for remote and freelance engagements.

CORE SKILLS

Odoo Development, ERP Systems, Business Process Automation, Workflow Automation, Web-Based Systems, Python, JavaScript, TypeScript
OWL.js, React, Vite, Bootstrap, SCSS, Chrome Extension Development, Web Scraping, Photoshop, Print Production Automation

PROFESSIONAL EXPERIENCE

IT Developer — Managed Uptime, Inc.

2023 – Present

- Design and deploy internal automation tools and ERP modules that eliminate repetitive manual processes across the company.
- Built an ERP workflow monitoring platform (Python, JavaScript, Odoo) centralizing procurement, inventory, logistics, and product sampling into a single system.
- Built sticker print-on-demand automation (JavaScript, Python, Inkscape) that generated personalized layouts, optimized material usage, and ran batch print-and-cut jobs.
- Created a suite of micro-automation tools, including a ClickUp Timesheet Extractor and browser bookmarklets, to remove recurring manual data-entry and QA work.

CRM Support — Managed Uptime, Inc.

2025 – 2026

- Managed and resolved customer support tickets, tracking response times and resolution status.

Email Campaign Specialist — Managed Uptime, Inc.

2021 – 2023

- Built and scheduled email marketing campaigns across multiple audience segments.
- Developed a Chrome extension automation to generate campaign data (UTM parameters, segment details) and run QA validation across 20+ segments per send, cutting campaign setup time from approximately 30 minutes to under 5 minutes.

Office Staff — MIS Support — J.H. Cerilles State College, Main Campus

2020 – 2021

- Provided technical support for the MIS Office's school information systems.
- Automated PDF export for approximately 8,000 student records, removing the need for manual per-record selection and export.
- Developed an automated PVC ID printing system processing 100 IDs per batch, scaling daily output from approximately 50 IDs/day (manual) to 500+ IDs/day.

Operations Officer — Perzeus Corp.

2019

- Managed company finance and inventory operations.

IT Intern — Department of Science and Technology IX (DOST IX)

2018

- Built a cheque auto fill-out and batch printing tool (Visual Basic) that replaced manual entry for 36 cheques per client with one-click batch printing and auto-incrementing dates.

EDUCATION

Bachelor of Science in Information Technology — J.H. Cerilles State College

2015 – 2019
